DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting **and** on the ground of nonstatutory obviousness-type double patenting as being unpatentable over:

Claims 1-13 of copending Application No. **10/740,787**;

Claims 1-13 of copending Application No. **10/741,382**;

Claims 1-8 of copending Application No. **10/744,284**; and

Claims 1-13 of U.S. Patent No. **7,099,445**.

Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to the same subject matter with minor wording variations.

The same subject matter is:

(a) The subscriber and subscription service (other terms are used in other copending applications such as “call center” are used in copending application 10/741,382, etc.) exist separately from the PSTN and are coupled to different portions of the PSTN (e.g., the PSTN and the subscription service are separate entities); and,

(b) The data communications link over which the alias of the subscriber is passed to the subscription service is separate from the telephonic link from the call to the called party in that it originates within the PSTN and terminates in the subscription service.

This is also a **provisional** obviousness-type double patenting rejection because a few of the conflicting claims have not in fact been patented.
